

Probity Autosystem SPA Assignment

Consolidated Implementation Notes & Code Diffs for Tasks 1-5

Overview

This document details the exact modifications made to the Probity Autosystem Pvt Ltd SPA website. All changes have been successfully compiled and verified locally in the React + Vite development workspace (**F:\spa**).

Tasks 1 & 2: Removing Duplications in Single-Item Sliders

File: src\App.jsx

Description: Removed duplicated carousel items in categories that contain only a single project slide (e.g., 'Battery Pack Conveyor' and 'SIERRA AIR CONNECTOR'). By disabling forced duplication, single-item lists now render a single card cleanly and automatically hide the navigation arrow controls.

```
// f:\spa\src\App.jsx (Lines 169-170)
const productVideoGroups = getProductCategoryGroups(
  productVideoSlides,
  ({ category }) => category
).map(([category, slides]) => {
  // REMOVED REPETITION LOGIC:
  // const sliderSlides = slides.length === 1 ? Array.from({ length: 4 }, () => slides[0]) : slides;
  const sliderSlides = slides;

  return {
    id: createProductGroupId(category),
    category,
    slides,
    sliderSlides,
    slideCount: sliderSlides.length,
  };
});
```

Task 3: Adding MES Integration Video in 1st Place

File: src\App.jsx

Description: Placed the video '1.mp4' from 'F:\spa\Probity Videos' in the public folder. Registered a new slide named 'Assembly Line Automation with MES Software Integration' in the 1st position of the 'Assembly Line Automation' category.

```
// f:\spa\src\App.jsx (Lines 3-9)
const productVideoSlides = [
  {
    title: "Assembly Line Automation with MES Software Integration",
    category: "Assembly Line Automation",
    thumbnail: "/product-videos/thumb_1.jpg", // Local extracted frame
    videoUrl: "/product-videos/1.mp4", // Local video path
  },
  // ... other slides
];
```

Task 4: Adding Local Videos for Armrest & Headrest Lines

File: src\App.jsx

Description: Placed the videos '2.mp4' and '3.mp4' in the public folder. Renamed 'RU Armrest Assembly Line' to 'Armrest Assembly Line' and updated it alongside 'J4U Headrest Assembly Line' to point to local paths instead of Google Drive links.

```
// f:\spa\src\App.jsx (Lines 106-121)
{
  title: "Armrest Assembly Line", // Renamed from RU Armrest
  category: "Assembly Line Automation",
  thumbnail: "/product-videos/thumb_2.jpg", // Local extracted frame
  videoUrl: "/product-videos/2.mp4", // Local video 2 path
},
{
  title: "J4U Headrest Assembly Line",
  category: "Assembly Line Automation",
  thumbnail: "/product-videos/thumb_3.jpg", // Local extracted frame
  videoUrl: "/product-videos/3.mp4", // Local video 3 path
},
```

Modal Player Upgrade (Supports Tasks 3 & 4)

File: src\App.jsx

Description: Modified the popup player modal component to check if the videoURL is a Google Drive link or a local file. If local, it plays the video dynamically inside a native browser HTML5 tag with autoplay and user play controls.

```
// f:\spa\src\App.jsx (Lines 3064-3084)

{activeVideoSlide.videoUrl && activeVideoSlide.videoUrl.includes("drive.google.com")} ? (
  title={`${activeVideoSlide.title} video`}
  src={getDrivePreviewUrl(activeVideoSlide.videoUrl)}
  className="h-full w-full"
  allow="autoplay; encrypted-media; picture-in-picture"
  allowFullScreen
  loading="lazy"
/>
) : (
  title={`${activeVideoSlide.title} video`}
  src={activeVideoSlide.videoUrl}
  controls
  autoPlay
  className="h-full w-full object-contain"
/>
)}
```

Task 5: Hero Badge Font Size & Readability Increase

File: src\App.jsx

Description: Increased the size and visibility of the 'PROBITY AUTOSYSTEM PVT LTD' text badge in the Hero section. Enlarged font size to 12px (mobile) and 14px (desktop), reduced tracking, adjusted padding to capsule dimensions, and scaled up the sparkles SVG icon on desktop.

```
// f:\spa\src\App.jsx (Lines 1003-1015)
-
+
  ...
-   className="lucide lucide-sparkles h-3.5 w-3.5 text-primary-glow"
+   className="lucide lucide-sparkles h-3.5 w-3.5 sm:h-4 sm:w-4 text-primary-glow"
  aria-hidden="true"
>
```
